Skills

Languages
TypeScript, JavaScript, Python, CSS

Frontend
React, React Native, HTML, Django

Backend
PostgreSQL, Knex, Express, JWT

Others
Git, GitHub Projects, Postman, Mocha, Chai

Projects

TomoTabi, -- Fullstack developer & Product owner
(In Progress)
github.com/tomo-tabi⧉
Deployment: Google Play store TomoTabi ⧉
Android application to plan your next trip with your friends and keep track of expenses and how much money is owed after the trip.
Stack: Node, PostgreSQL, Knex, React Native, JWT, Heroku, Google Play Store, Typescript, Express, JavaScript.
- Deployed the application on the Google Play Store.
- Worked on the frontend design.
- Secured data transactions with JWT and hashed information to protect the user's data.

Restore, Fullstack developer
(In Progress)
github.com/calss0t/Restore⧉
Deployment : polyglottal.vercel.app/ ⧉
Web application where you can play games.
Stack: Python, PyScript, Django, JavaScript, HTML, CSS, Vercel.

Twin-Shot, -- Fullstack developer
github.com/calss0t/Twin-Shot⧉
Deployment: https://twin-shot.onrender.com ⧉
Web application that helps you keep up to date with your favourite sport teams and leagues
Stack: JavaScript, HTML, CSS, JWT, Render, PostgreSQL, Render.
- Incorporated persistent data storage to save you favourite teams in a user page.
- Managed calls to an external API.
- Optimized data queries to the API to work around the daily request limit set by the provider.
- Secured data transactions with JWT.
